

Jonathan Lin
Senior Cybersecurity Software Engineer
The Aerospace Corporation

Jonathan Lin received his B.S. degree in Computer Science Engineering from UC Irvine in 2014 and his Master's in Computer Science from UCLA in 2018. He previously worked at the FBI in the role of Computer Scientist for two years where he performed cyber forensics, developed software tools, and provided investigative technical expertise. He is currently a Senior Cybersecurity Software Engineer at The Aerospace Corporation. His main responsibilities include building defensive cyber operations prototypes for space weapon systems and evaluating satellite command and control software security.
