

Dr. Al-Hashimi currently serves as an Assistant Professor of Ophthalmology in the Cornea Division at Stein Eye Institute, UCLA. His activities include laser refractive surgery (LASIK, SMILE and PRK), femtosecond laser assisted cataract surgery (FLACS), corneal transplantation (including PKP, DALK, DSAEK and DMEK), and the surgical management of a variety of ocular surface diseases.

His research interests include keratoconus and dry eye. Dr. Al-Hashimi performs corneal crosslinking and he helped launch a dry eye clinic that specializes in the latest diagnostic and treatment modalities.
