

Stavros N. Moysidis, MD

Stavros N. Moysidis, MD, is an Adult & Pediatric Retina Specialist and co-founder of Retina Los Angeles. He received his vitreoretinal surgery fellowship training at world-renowned Associated Retinal Consultants / Beaumont.

His clinical and research interests include macular degeneration, diabetic retinopathy, macular holes, retinal detachments, proliferative vitreoretinopathy, ocular trauma, retinopathy of prematurity, Coats' disease, familial exudative vitreoretinopathy, persistent fetal vasculature, and advanced vitreoretinal surgical techniques, including surgery for premature infants, complex retinal detachment repair, and grafting techniques such as autologous retinal transplantation and human amniotic membrane implantation.

Dr. Moysidis received his ophthalmology residency training at the LAC+USC Medical Center, USC Roski Eye Institute, and Children's Hospital Los Angeles, and his medical education at the University of Miami. At the Bascom Palmer Eye Institute, he developed a novel, minimally invasive, nanoparticle-based, cell delivery system for the magnetic transplantation of human tissue, which is now in clinical trials and for which he holds a patent.

Dr. Moysidis has received numerous prestigious honors, including the Ronald G. Michels Fellowship, the Heed Fellowship, the Dr. Alving Endowed Biomedical Research Award, and the Lombardi Scholarship. He has published over 30 peer-reviewed manuscripts and book chapters in internationally esteemed journals, including *Proceedings of the National Academy of Sciences*, *Ophthalmology*, *Nanomedicine*, *Retina*, and *Investigative Ophthalmology & Visual Science*.
