

Dr. Ference is an Assistant Professor of Clinical Otolaryngology. She has a special research and clinical interest in minimally-invasive sinus procedures including balloon sinuplasty, steroid eluting implant placement, inferior turbinate reduction, eustachian tube dilation, and nasal valve repair. She has published extensively on evidence-based antibiotic usage, balloon sinuplasty and outcomes of sinus surgery. She has an undergraduate degree in Public Policy from the Princeton University Woodrow Wilson School of Public Policy and International Affairs. She completed a joint medical and public health degree at Harvard University, residency at Northwestern University McGaw Medical Center, and fellowship in Rhinology and Skull Base Surgery at University of California, Los Angeles. She is dedicated to improving the quality of life of both adult and pediatric patients with sinus problems and allergies.
