

I received my bachelor's of science degree in Biology in 1997 from Rutgers University. I went on to obtain my MD degree from the Johns Hopkins University School of Medicine in 2001. During medical school, I performed neuroscience research with Dr. Solomon Snyder focusing on neurodegenerative diseases and neuronal death. I completed my residency in Otolaryngology-Head & Neck Surgery at Johns Hopkins. My training involved two years in the lab of Drs. Bert Vogelstein and Ken Kinzler where I studied cancer genetics. I then completed a one year clinical fellowship in head and neck surgical oncology at Memorial Sloan Kettering Cancer Center. I joined the faculty at Johns Hopkins as an Assistant Professor in Otolaryngology-Head and Neck Surgery in 2009 and was recruited to the University of Chicago in 2015. Currently, I am a Professor of Surgery, Chief of Otolaryngology-Head and Neck Surgery, and Director of Head and Neck Surgical Oncology at the University of Chicago.
